Profile

I am a Software Engineer specializing in Back-End Development using PHP, Laravel, and MySQL. I design and build scalable web applications, develop robust APIs, manage databases, and deliver solutions across web design, content management, software testing, and project coordination. My focus is on creating clean, efficient, and reliable systems. I hold a Bachelor's degree in Software Engineering.

Work experience

04/2023 – 09/2023
Gaza, Palestine

Backend Development Trainee
Vision Plus

- Developed web applications using Laravel following MVC architecture
- Built RESTful APIs for handling user data and system operations
- Implemented authentication systems and CRUD functionalities
- Worked with MySQL databases for data storage and management

12/2025 – 02/2026
Gaza, Palestine

Backend Development Trainee
Code Tech

- Gained hands-on experience in backend development and server-side logic
- Designed and managed databases and API endpoints
- Improved problem-solving skills through real-world backend scenarios

Education

09/2021 – 03/2026
Gaza, Palestine

Software Engineering | Bachelor of Software Engineering Al-Azhar University

Studied at the Faculty of Engineering and Information Technology.
Graduated with a GPA of 84%

Skills

Technical Skills

- Programming Languages : Java, PHP
- Frameworks : Laravel
- Databases : MySQL
- Web Technologies : HTML, CSS, JavaScript
- Concepts : Object-Oriented Programming (OOP), Design Patterns, Web APIs
- Tools & Platforms : Git, GitHub

Soft Skills

- Problem Solving
- Analytical Thinking
- Communication and Teamwork
- Time Management
- Adaptability and Quick Learning
- Attention to Detail

Projects

Wajbati Platform (Full-Stack Web Application)

- Developed a full-stack food ordering platform connecting home-based cooks with customers
- Designed and built RESTful APIs using Laravel to manage users, orders, and authentication
- Structured the backend following MVC architecture
- Implemented secure authentication and authorization system
- Designed and managed relational database using MySQL
- Developed and tested API endpoints using Postman
- Collaborated on front-end development to integrate backend APIs
- Live Demo (Front-End): https://momen-ai.github.io/wajbati-front/
- Source Code (Backend): https://github.com/Momen-ai/wajbati.git
- Source Code (Front-End): https://github.com/Momen-ai/wajbati-front.git
- Technologies: Laravel, PHP, MySQL, HTML, CSS, JavaScript

Personal Portfolio Website (Full-Stack)

- Developed a full-stack personal portfolio using Laravel for backend and a responsive front-end interface
- Built backend structure to manage content dynamically and support scalability
- Designed clean and modern UI to showcase projects and technical skills
- Integrated backend with front-end to handle data and future enhancements
- Live Demo (Front-End): https://momen-ai.github.io/Portfolio/
- Source Code (Backend): https://github.com/Momen-ai/Momen-Portfolio.git
- Source Code (Front-End): https://github.com/Momen-ai/Portfolio.git
- Technologies: Laravel, PHP, MySQL, HTML, CSS, JavaScript
